The Great Escape has constructed a 108kw wind turbine on the property. The turbine is sitting atop an 80 foot tower with 62 foot blades to catch the wind, with 30 feet of concrete for its base. The turbine produces over 100% of the electric power needed to operate the business. Any excess power the turbine produces goes out to the ComEd grid to supplement the power needs of the surrounding community with clean energy. If the restaurant owner, Brian Great, is available he will be happy to show us the control center for the wind turbine at 6:30p.m., weather permitting.
